Essentials for New Lightning Experience Administrators
(ADX201)

Job Role: Administrator

Duration: 5 days or 10 half days

Discover the world of a Salesforce Administrator by working firsthand to configure and customize a Salesforce org. In this 5-day class designed for new admins, our experts guide you through the daily tasks and features that Salesforce Administrators encounter. Learn about Salesforce's architecture, how to manage users, and how to keep your org secure. Dive into best practices surrounding customization, set up automation to improve efficiency, and create reports and dashboards for data analysis.

Overview

Who should take this course?
This class is ideal for new and beginner Salesforce System Administrators or people looking to increase their skills in configuring, maintaining, and automating Salesforce. It is also an excellent class for anyone looking to earn their Salesforce Administrator credential.

When you complete this course, you will be able to:
✓ Explain the Salesforce architecture and key terminology.

✓ Use the application development lifecycle to define the process of managing an app's development, from design to final release.

✓ Compare different methods for granting users access to functionality and data. Build and customize applications to meet business requirements.

About CloudWise

We offer Authorized Salesforce training with several guaranteed-to-run classes each month. We are an industry-leading authorized Salesforce training provider and part of Layer 8 Training.

✓ Describe use cases for data management and validation tools.

✓ Analyze key performance indicators with reports and dashboards.

✓ Automate business processes using key features and functionality.

✓ Leverage the Salesforce ecosystem and resources to implement and maintain your Salesforce org.
